Database-Neo4j

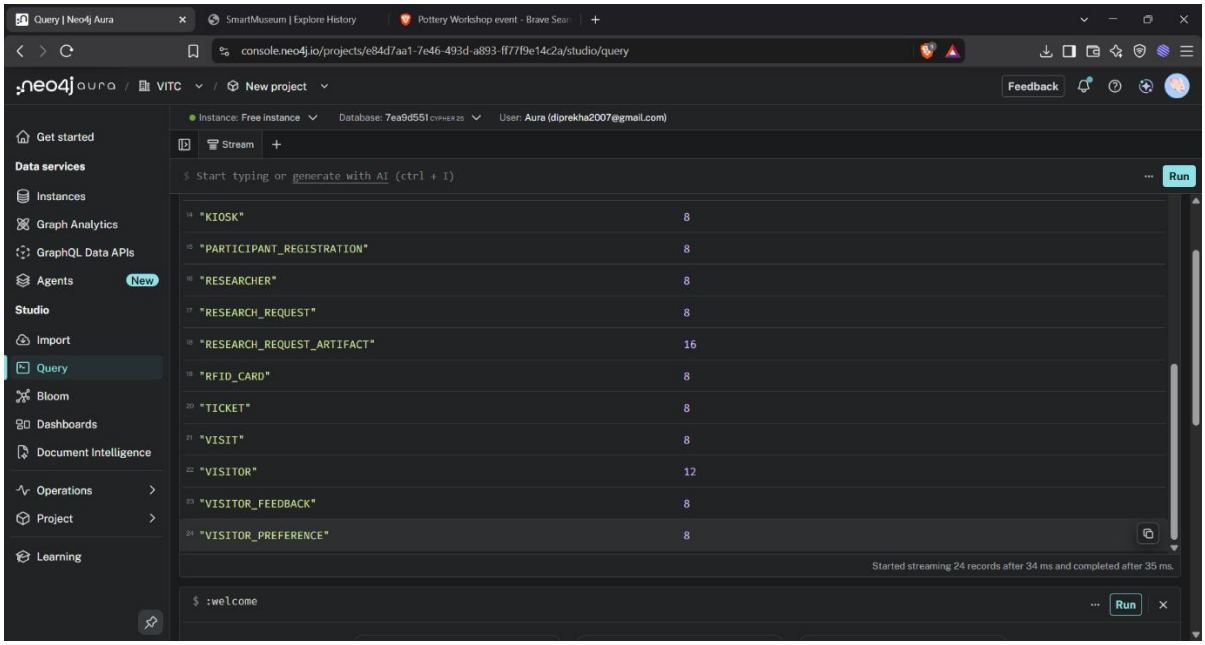

We use Neo4j, a graph database, to store and manage connected data using nodes and relationships. In our SmartMuseum project, it helps connect artifacts, galleries, exhibitions, events, and other entities, making it easier to explore relationships between them.

GUIDE
Query fundamentals
You'll learn to:
write basic queries;
view graph and tabular results;
perform queries to answer questions;
perform advanced queries.
DATASET
Try Neo4j with the Movie Graph
Dive into a fully-built graph example to kickstart your Neo4j journey. Discover key query patterns through a fun, familiar world of actors and films.
Go to Learn Center
See the full catalogue of guides to help you get the most out of Neo4j.
